DETAILED ACTION

1. This office action is in response to communication filed on 3/9/2010.
2. Claims 1-2, 4-7, 9, 11-20 are presented for examination.

Allowable Subject Matter

The present invention is directed for method and distribution system, the system including a digital contents server storing a plurality of digital contents to be provided, an advertisement information server storing advertisement information which is to be set in advertisement areas of digital contents, and a plurality of user terminal devices. In response to download requests for specific digital contents from users, the digital contents server forwards an identifier of the digital contents and an identifier of the user to the advertising information server; and the advertising information server returns selected advertising information to the digital contents server for insertion in the digital contents. The selected advertising information is selected by the advertising information server based on the digital contents identifier and the user identifier. Using this system, the advertiser is able to selectively control advertising content for each individual download of digital contents to users at the time of downloading.

3. The closest prior art are:

Herz (5,835,087) discloses an automatic clipping service that learns to select new articles to match user's interests.

Ebisawa (5,946,664) relates to a driving game program that includes advertisements which are updated using downloaded information.

Sony (JP 2000-029712) teaches enabling a user to determine which advertisements are displayed, while taking a look at a display device by allowing a terminal station to select and insert sent advertisement data into an image of the program of a game sent from a host station and then supplying them to game machines connected to the terminal station.

Independent claims 1, 4-5, 12-13 identify the uniquely distinct feature of **“generating a table of information linking addresses in the advertising information server for the advertising information to the respective insertion locations of the addressing information; making a judgment whether or not the insertion location is a location is a position for inserting advertisement information and positioning the advertisement information on an affirmative judgment”**

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
